

FIBERGLASS PIPING SYSTEMS

TS&M Supply is the exclusive Canadian Oilfield distributor of Star™ Super Seal, Fiberspar LinePipe™ and Bondstrand® fiberglass corrosion resistant products, including linepipe, downhole tubing, and low pressure facility piping products. Our many fiberglass piping options offer a number of benefits over traditional materials like steel. Benefits of using fiberglass are ease of installation, reduced installation costs, elimination of failures due to corrosion, low maintenance, and life cycle costs. With over 35 years of experience selling Fiberglass products, TS&M's technical expertise, product selection and commitment to service and safety ensures we will meet your fiberglass requirements. TS&M field supervisors have solid industry experience and are qualified by the manufacturer to provide training certifications and supervision on the product and installation procedures; available 24 hours a day.

APPLICATIONS IN CANADA

- Flow/Emulsion lines
- Injection/Disposal lines
- Group lines
- Gas gathering & transport lines
- Low pressure battery & facility piping
- Acid/Polymer facilities
- Water processing
- CO₂, H₂S
- De-watering lines
- Liners for linepipe & tubing
- Injection/Disposal tubing
- Production tubing
- Cement stingers
- Coal bed methane
- Casing
- Hydrogen Transportation/Storage

FEATURES

- Corrosion resistant to commonly found corrosion elements in oil and gas applications (internal and external)
- CSA compliant
- Environmentally friendly option
- Can tie into any product: steel, spoolable, and fiberglass systems
- Supervision & technical services available
- Linepipe with operating pressure up to 3000PSI in sizes 2"-12"
- Downhole tubing operations pressures of up to 3250 PSI in sizes ranging from 1.5"-9 5/8"
- Prevents paraffin and scale build-up
- Flow characteristics 1 1/2 times better than steel
- At 1/4 the weight of steel, handling and installation costs are reduced substantially
- Fast, reliable, make-up; industry standard and premium end connectors available. IJ & T&C
- Can be assembled in any weather
- Tubing and casing with deep hole capabilities of more than 10,000ft with pressure up to 2500 PSI
- Temperature range up to 100°C(212°F)
- Facility piping operating pressures of up to 362 PSI in sizes 2" - 16"

FIBERGLASS PIPING SYSTEMS

FIBERGLASS LINEPIPE – STAR™ SS (SP/SPH), SSS, SS-HP, ACT AND PGT 8rd

- Large diameter linepipe products are manufactured in sizes ranging from 2" – 14".
- Pressure capabilities up to 3500psi, depending on size and temperatures up to 212°F.
- Typically used to transport highly corrosive produced water and CO₂ gas.
- Used in lower to medium pressure oil and gas flow lines where corrosive flow is encountered.
- The epoxy resin systems are anhydride and aromatic curing agents with each providing slightly different chemical and temperature resistance.
- Manufactured to a minimum design life of 20 years at rated temperature and pressure according to the ASTM D2992 Procedure B and industry standards, such as API 15HR.

FIBERGLASS FACILITY PIPING – BONDSTRAND & SMITH RT AND GT

- Stock in diameters of 2" to 16" and in pressure classes of HP16–25 (larger sizes available upon request).
- Pipe sections are assembled using the Taper/Taper adhesive joint.
- Provides significant savings due to its light weight and easy installation features.
- Little to no heavy handling equipment is required.
- Superior corrosion resistance to oilfield fluids.
- Large diameters in pipe and fittings for handling high volume flow rates.
- Long service life, light weight, corrosion resistance, and improved flow characteristics.
- An excellent option in the oilfield for water handling, vapor recovery, production gathering, and inner battery lines where corrosion of steel is an issue.

FIBERGLASS TUBING/CASING – CENTRON DH, STAR ACT/DHT

- NOV Fiberglass Systems is the leading downhole GRE producer in the industry due to its unique proprietary fiberglass layering sequence, which provides superior tensile performance.
- Tubing is offered in 1 1/2" – 9 5/8" with pressure ranges up to 3250 psi.
- Available in 4RD and 8RD – EUE thread. IJ or T&C
- Used in a variety of highly corrosive applications such as:
 - Saltwater and CO₂ injection/disposal wells for corrosion control.
 - Observation wells for monitoring formations where steel can interfere with equipment.
 - Producing wells – where steel products corrode easily.

FIELD SERVICE

- Factory trained and certified Field Technicians with a combined oilfield fiberglass piping experience of over 300+ years.
- Large assortment of fiberglass installation tools available for sale or rent.
- Ability to work with customers on product selection as well as itemized and accurate estimations.
- TS&M Fiberglass to provide initial training/certifications/supervision for pipeline contractors on various products where required.

SPOOLABLE – FIBERSPAR & DURAFLEX

- Sizes from 2" – 6".
- Pressures from 500psi up to 2,250psi.
- Reel Lengths up to 2,743m.
- NOV Certified installation.
- Installation methods include: open trench, liner and boring.
